

ENERGYWISESM

Use less. Spend less. Do more.

Sponsored by Nebraska Public Power District in partnership with its Wholesale Utility Customers.

Program made possible by a grant from the Nebraska Environmental Trust (NET) and a partnership with the Nebraska Community Energy Alliance (NCEA).

The Nebraska Environmental Trust was established in 1992 to conserve, enhance and restore the natural environments of Nebraska. The Trust is to lead the development of a vision of Nebraska's future environment. The Trust is to collaborate with public and private efforts to achieve that vision.

The mission of the Nebraska Community Energy Alliance is to build and promote advanced technologies for housing and transportation that save energy, reduce CO2 pollution and cut costs.

Leading Nebraska's Electric Vehicle Charge with Incentive Programs

powered by **ENERGYWISESM**
Use less. Spend less. Do more.

The upfront cost of electric vehicles (EVs) is considered one main obstacle to potential consumers. NPPD, in partnership with wholesale utility customers, has new incentives available created in part by grants from the Nebraska Environmental Trust and Nebraska Community Energy Alliance that can help reduce the purchase price of an EV and related infrastructure, including pre-wiring, conduit and charging stations.

Electric Vehicle and ChargePoint charger incentive: \$4,500

- \$4,500 incentive for the purchase of a new battery electric vehicle and the installation of a residential ChargePoint charger.

Charging station only incentive: \$500

- \$500 incentive for the installation of a residential vehicle charging station.
- ChargePoint 32 Amp, WI-FI enabled station.
- Internet wireless connectivity.

Pre-wiring incentive: \$200

- \$200 incentive for new construction for in home pre-wiring for the future installation of an electric vehicle charging station.
- 100% of costs (maximum of \$400) incentive for existing structure for in home pre-wiring for the future installation of an electric vehicle charging station.

Commercial Charger Conduit Incentive: \$1,000

- 100% reimbursement incentive (maximum of \$1000) for new commercial construction for the installation of conduit to be used for the future installation of an electric vehicle public charging station.

Commercial Charger Incentive: 50%

- 50% reimbursement incentive for the installation of equipment for the installation of an electric vehicle public charging station.
- Eligible grants, discounts etc. are deducted from the total cost to determine customer's cost. This amount is eligible for 50/50 cost share.
- The reimbursement incentive is based on the lower of two qualified bids being submitted to the utility.

EV Promotional Events: 100% up to \$2,000

- 100% reimbursement of event expenses (up to \$2,000) associated with an electric vehicle event
- Primary focus of the event is the promotion of electric vehicles (i.e. ride and drive events, dealership promotion of new electric vehicle models, home shows, etc.)

Follow these easy steps

- Visit with your electrical utility to discuss your EV and charging needs and pick up an application form, and ensure incentives are still available.
- All programs will require a reservation request prior to purchase and/or installation.
- Incentives have a limited time to purchase and/or install, which if not met will expire.
- Once approved, there will be a time period to provide proof of purchase or installation.
- Submit payment request after purchase and installation.
- Charger installation location and vehicle registration must be the same location and be a single or multi-family residential location and have internet wireless connectivity to qualify.
- Incentives are limited so check with your local public power utility for availability.

Incentives valid as of 8-15-2019. Subject to change without notice. Verify current incentive amounts and program information at www.nppd.com. This program is only available to customers of NPPD and customers of its wholesale utilities.
